www.countryclubtreeservice.com

How do you know it is a champion?

The US Forestry Association has worked out a formula used worldwide for determining Champion Trees.

1. Measure tree trunk four and one half feet above ground. If the tree branches low, measure the narrowest point between four and one half feet and the ground. If it is a multi-stem, measure only the largest stem. Give tree one point for each inch of circumference.
2. Take the height of tree and give one point for each foot of height.
3. Take spread of tree twice, at 90-degree angles; divide in half. Give tree 1 quarter point for each foot of spread (drip line).

Total the points together. If you think you know a Champion Tree, give us a call.

We will come out and measure the tree accurately and identify the species.

All trees on the Greater Kansas City Champion Tree list must be in Jackson County Missouri or Johnson, Clay or Wyandotte Counties in Kansas.

At Each Champion Tree, a label will be placed at ground level stating it is a "Champion Tree", with the common and Latin names.

Chuck Brasher and Country Club Tree Service would like to thank the following for their time and help in compiling a current list.

Larry LeKamp, Consulting Forester

Jerry Monasterelli, (Retired) Urban Forester MO Dept. of Conservation

Helene Miller, Urban Forester MO Dept. of Conservation

Chuck Commers, Urban Forester MO Dept. of Conservation

Bob Haines, Arborist

Rick Spurgeon, City Forester City of Olathe Kansas

Jerry Darter, (Retired) Director KCMO Parks and Recreation

Mark Young, ISA Board Certified Master Arborist certificate# MW 01034; Owner - Country Club Tree Service

George Eib, Arborist of Country Club Tree Service

Bill Roach, City Forester Independence MO

Mike Dougherty, Tree Management Co.

Alan Branhagan, Horticulturist, Powell Gardens

Sara Bond for Clerical Work

Think Trees... Your future depends on their survival!

REMEMBER...

- ◆ TREES supply the oxygen we need to breathe.
- ◆ TREES keep our air supply fresh by absorbing the carbon dioxide that we exhale and also that which is emitted by factories and engines
- ◆ TREES are natural air conditioners. They lower air temperatures by evaporating water in their leaves.
- ◆ TREES cut down noise pollution by acting as sound barriers.
- ◆ TREES trap and filter out dust and pollen on their hairy leaf surfaces.
- ◆ TREES shelter us from direct sunlight on hot sunny days.
- ◆ TREE roots stabilize the soil and prevent erosion.
- ◆ TREES provide us with color, flowers and lovely shapes
- ◆ TREES camouflage unsightly scenes and break the monotony of endless highways, sidewalks and lawns.
- ◆ TREES slow down strong winds.
- ◆ TREES give us privacy.

#####

The trees of our forest and those of the urban areas that have lived for these many years have done so because they have managed to overcome the adversities that others have not.

Our urban trees, the trees on our lawns, along our roads and in our parks will not survive without our help. Insects, diseases, excavations, paving, drought, air pollution and other natural and man-made causes are continuously at work to weaken and ultimately kill the trees of our urban areas.

YOU CAN HELP! Trees need care, proper pruning, spraying, fertilization and the appropriate amount of moisture will help to insure that they continue to thrive.

You should see to it that your trees get the attention they need, professional help is available when required. Call your local certified arborist, they are familiar with local tree problems and can provide all of the services that you need to properly care for your trees. A certified arborist stays abreast of current developments and techniques via trade association affiliations, the State Extension Services and many other sources. If you have questions about your trees health call in a professional arborist, just like you would call in your doctor for your own health.

NATURE AT IT'S WORST IS BETTER THAN THE WRONG KIND OF TREE WORK, OR WORK NOT WELL DONE!

Theodore Roosevelt was a great lover and authority of trees. On his last visit to Kansas City, shortly before his death, he visited Forrest Hill Cemetery and stated to his guide that it contained one of the finest collection of trees he had ever seen.

Several Champion Trees are in the Forest Hill Cemetery located at 6901 Troost, Kansas City, Missouri.

A large number of Champions are also located in Loose Park, 5200 Penn, Kansas City, Missouri.

Linda Hall Library, located at 51 st & Cherry, Kansas City, Missouri, their 14 acre grounds contain more varieties of trees than any other place in Kansas City. Several Champion Trees are located on the Library grounds. Call Scott Rider, Groundskeeper at 816-926-8747 if you would like to arrange a guided tour.

A COUNTRY WITHOUT CHILDREN WOULD BE HOPELESS...

A COUNTRY WITHOUT TREES WOULD BE ALMOST AS HOPELESS!
